

## PEHP Response

Submitted 02/23/2018 09:51:37

### **SCR014 - Concurrent Resolution on the Public Employees' Health Plan**

Any Fiscal Impact - no

Updated 02/23/2018 09:51:29 by Shelley Wiseman

SCR 14 doesn't alter the basic benefit design of Utah Basic Plus. It will still be an HSAqualified plan with the same deductible, state HSA contribution, coinsurance level, and maximum out-of-pocket. What is different is the way that PEHP would pay for medical services. Instead of PEHP paying different amounts depending on which provider a member sees, PEHP would pay the same amount regardless of who the provider is. This will save the state money to the extent reference prices are below average rates in the market and rates for medical services that cannot be paid through reference pricing do not substantially increase.
