Common Non-Preferred Medications With Preferred Alternatives

Lowercase = Generic | **All Caps** = Brand name | **QL** = Quantity limit applies | **PA** = Requires pre-authorization | **NC** = Not covered | * = Not available at mail-order

Did you know that you may lower your copayment by asking your doctor if your prescription is available in an equivalent generic or a preferred brand name? Generics are available at the lowest copayment, and a preferred brand name can save you up to 25% compared to non-preferred. PEHP recommends speaking with your doctor about generics or preferred brand alternatives when he/she has chosen a non-preferred drug.

What are specialty medications?

They are costly drugs that require special handling and shipping or are required by the manufacturer to be dispensed by a specific pharmacy, such as PEHP's specialty pharmacy, Accredo. PEHP may require you to buy your specialty medications through Accredo for coverage. You can find out where to buy your specialty medication for coverage at www.pehp.org.
